The attached material is forwarded to you for retention.

Attachment:

A photostat copy of the 1952 material requirements plan for the construction of boilers, prepared by the VVB Energie - und Kraftmaschinenbau (Construction of Electricity Generating Machinery) at 149 Merseburgerstrasse in Halle/Saale. *in German*

Comment: The Five-Year Plan calls for the amount of electric power generated to be increased to 33,400,000,000 kw-h. To achieve this target it will be necessary to increase the boiler capacity, which is now inadequate because of dismantling and because much of the present equipment is antiquated. Thirty plants are subordinate to the VVB EKM in Halle. According to a letter of the Ministry of Machine Construction, dated 17 December 1951, two VVB EKM plants, the Meerane Steam Boiler Construction plant, formerly L. Oschatz Ltd., at 65 Zwickauerstrasse in Meerane, and the Hohenthurm Steam Boiler Construction plant, formerly the Natorp and Eberhardt plant, in Hohenthurm near Halle, were declared priority plants by a government order and must be given preference in the supply of materials.
